

SHAIK FAISEL AHMED

📞 91-8217310699 ✉️ shaikfaisel129@gmail.com [🌐 LinkedIn](#) [📁 GitHub](#) [📁 Portfolio](#) [📍 India](#)

TECHNICAL SKILLS

Hardware & Electronics: Embedded Systems (IoT), VLSI Design, PCB Design, D&A Electronics, Multisim, MATLAB
Programming Languages: Python, C/C++, JavaScript (ES6+), Verilog
Web & Application Development: React.js, Flask, HTML5, CSS3, REST APIs, JWT Authentication, Responsive Design
Databases: MySQL, MongoDB (Concepts), Database Design
Tools, Platforms & Practices: Git & GitHub, OpenCV, Postman, VS Code, Firebase, Dalmia, Agile/Scrum, OOP & DSA System, Design (Basics), Cloud Fundamentals
Productivity & Office: MS Word, MS Excel, MS PowerPoint, Canva

EXPERIENCE

[Certificates](#)

Centre for Development of Advanced Computing (CDAC)

April 2025 – June 2025

— Full Stack Development Intern

Bengaluru, India

- Engineered a secure Online Voting System using Flask, OpenCV, and MySQL, achieving 98% accurate face-recognition authentication and real-time dashboards.
- Refactored backend SQL queries, reducing vote-processing time by 40% and lowering code redundancy by 30% through modular design.
- Collaborated with an Agile team of six, contributing to sprint planning, peer code reviews, and version control using Git.

Rooman Technologies

September 2024 – March 2025

— VLSI Design Engineer Intern

Bengaluru, India

- Designed and simulated 10+ digital circuits using Verilog/VHDL, achieving 100% functional verification and 98% timing accuracy.
- Supported layout design and floor planning for VLSI modules, optimizing chip area by 12% and reducing power usage by 10%.
- Implemented a low-power ALU through clock-gating and operand-isolation techniques, yielding a 15% reduction in dynamic power consumption.

Dassault Systems

June 2024 – July 2024

— Systems Engineer Intern

Bengaluru, India

- Developed and validated a Four-layer PCB for EV electronics using DELMIA, enhancing circuit stability by 20% and minimizing signal interference.
- Contributed to system integration and circuit optimization, boosting EV performance and reliability by 15%.

PERSONAL PROJECTS

Early-Stage Neurological Disorders Identification Using BCI | Python, Machine Learning, Firebase

[🔗 GitHub Repo](#)

- Built a Brain-Computer Interface (BCI) system integrating bio-signal acquisition hardware with ML algorithms for epilepsy detection, achieving 92% accuracy and reducing diagnosis latency by 35%.

Online Voting System with Face Recognition | Flask, OpenCV, JavaScript, MySQL

[🔗 GitHub Repo](#)

- Created a secure web platform with 98% facial-recognition accuracy and real-time result dashboards, accelerating vote-tallying by 40%.

ACHIEVEMENT

Best Major Project Award (SPP) — Karnataka State Council for Science & Technology

September 2025

EDUCATION

- B.E. in Electronics & Communication — HKBK College of Engineering (VTU) — 2021–2025
- PUC (Science Stream) — Maharashtra State Board — 2019–2021
- SSLC — Karnataka State Board — 2018–2019

CGPA: 6.76
Percentage: 81%
Percentage: 60%

LANGUAGES
